— UNDER THE HOOD — ENTERPRISE-GRADE, MADE SIMPLE

The same building blocks that power large fintech billing platforms — the **WhatsApp Business Cloud API**, **webhook-driven payment reconciliation**, and **n8n workflow orchestration** — tuned for your business and priced for one. You don't touch any of it; you just watch it work.

— THE TECHNOLOGY, IN PLAIN TERMS

 META-APPROVED TEMPLATES Messages that actually deliver Pre-approved WhatsApp template messages with delivery & read receipts — no spam flags, no blocked numbers.	 WEBHOOK RECONCILIATION Payments mark themselves paid The gateway fires a webhook the instant a customer pays; idempotent matching updates the ledger — zero manual entry.
 CRON-SCHEDULED WORKFLOWS Runs on its own, every day n8n triggers the day's list, sends within TRAI-safe hours, and emails your report on the 1st — hands-off.	 OPT-IN & DND COMPLIANT Safe, under your name Consent-based sending, sane windows (no 6am / late-night), and every message under your business identity.

— WE SPEAK RETAIL 🛒

From **udhaar khata** to the festival rush, we know how a kirana runs — automation that fits your counter, not a corporate POS.

Khata / Udhaar Running credit balances, digitized	UPI / Pay-Now One-tap collection on reminders	SKU / Stock Your product list mapped for orders

WHY SHOPS SEE RESULTS

Automation turns your shop into a **loop**: an order comes on WhatsApp, you prep it, it's paid or added to khata, the reminder brings the balance in — and the customer comes back. Every week, on its own.

FROM PAPER NOTEBOOK TO PHONE-RUN SHOP

BEFORE

- ✗ Paper khata and disputes over balances
- ✗ Customers walk in and wait — or go elsewhere
- ✗ You forget who owes what
- ✗ No easy way to push offers to regulars

AFTER ALH

- ✓ Every balance digital and agreed
- ✓ Orders arrive on WhatsApp, prepped and ready
- ✓ Auto reminders bring the udhaar in
- ✓ One-tap festival & stock broadcasts
